Document History Enhancement For MCOA SSR In Worldspan®

Product Advisory Number:	651
Version:	01

Load To Production:	15APR09	Between 03:30 and 05:30	**EST**	Between 08:30 and 10:30	**GMT**

High Level Description:	Following Product Advisory PA 633 to implement a new SSR code for MCOA to identify system generated MCO numbers on December 09, 2008 Document History is now being enhanced to store the system generated MCOA number in Document History. When an automated 'paperless' MCO is issued and the SSR MCOA is created and a teletype message is transmitted to the applicable airline the MCOA number will also be stored and displayable in Document History.
Impact Summary:	The Document History field will automatically be populated with this new data after an automated MCO is issued. Screen scraping applications may need to accommodate the new screen information.
Reason For Issue:	First Notification

Customer Impact:				
	☐	Internal Only	☐	Developers
	☑	Agency Customers	☑	Airline Customers
	☑	eCommerce Customers	☐	Car, Hotel, Rail or Cruise Customers

System:		
	☐	Galileo
	☐	Apollo
	☑	Worldspan

Load To Copy:	08OCT08	Between 03:30 and 05:30	**EST**	Between 08:30 and 10:30	**GMT**

Web Services: (API and Messaging)	Added D.I.R. Message Update for this product. For full D.I.R. Document History (DOCHA/DOCH) Message details please refer to the D.I.R. SDK website. http://sdk.worldspan.com/ http://dirsdk.wspan.com/secure/LoginNew.asp?Res=true
Issue History:	Version 01

Overview

To provide an interim solution until the EMD (Electronic Miscellaneous Document) is implemented, Travelport released an enhancement on December 9, 2008 to transmit an automated SSR MCOA message to applicable carriers to identify system generated MCO numbers when an automated MCO is issued.

The SSR MCOA message applies only to 'paperless' automated MCOs issued in BSP (Bank Settlement Plan) markets.

The SSR MCOA message does not apply to 'Service Fee' MCOs.

As a follow-up to the December 9, 2008 release (described above), Document History is being enhanced to store and display that an SSR MCOA item has been created and sent to a carrier.

Customer Benefit

- Confirm system generated SSR notification to the airline upon MCO issuance.
- Industry standard to avoid confusion and promote consistency.

Detail and Customer Examples

1. Document History

    1.1. A new element for the automated SSR MCOA message will display in the Document History. The new element identifier is TMN (Transmit MCO Number) and will display as part of the MCO 'grouping' elements in the Document History.

    1.2. The new element identifier of TMN (Transmit MCO Number) will be added to the Document History when an automated SSR MCOA message is transmitted.

    The following is an example of the document history (partial display) to show the new TMN element identifier and data (shown in bold for illustration only) in the document history display.
