Overview

Implement ATPCO's International 18:00 (Eastern Time) transmission of fares data across all Travelport fares platforms and systems.

Customer Benefit

- This will provide more accurate fares for all users of the Travelport fares systems, and ensure the most current fares are available for users at the start of their business days, specifically customers in the Middle East, Asia, and the Pacific.
- This also benefits airlines as it provides faster distribution of their fares.

Detail and Customer Examples

There are no changes to Functional Entries. This change is functionally transparent to the customer supplying more current fare data only.

This effort is to allow for receipt and processing of ATPCO's 1800 (Eastern Time) transmission of International fares data across all Travelport fares platforms and systems. This is for International fares data only. There is no change to the North American transmissions.
