*** Additional Information**

**Web Services
(API and Messaging)**

This new information will be included in existing Web Services message responses, no new Web Services requests or formats are required and Web Service customers will receive these on the same load dates.

Overview

An agenda item to eliminate the following minimum checks was approved at the October 2007 IATA RAP meeting in Montreal:

- Country of Payment (COP)
- Common Point Minimum (CPM)
- Directional Minimum Check (DMC)
- Normal fare Check (OSC)
- Return Subjourney Check (RSC)

In addition, IATA has amended the definition of a Normal Open Jaw to include the provision: “except for pricing units wholly within Europe, Europe shall be considered as one country”.

This change applies to Origin Normal Fare Open Jaws. For Turnaround Normal Fare Open Jaws, this logic already applies.

Customer Benefit

- Simplified fare calculation
- Increased pricing solution options

Detail and Customer Examples

The date of ticket issue or sale and not the date of commencement of travel should be used to determine whether or not the minimum checks apply.

The minimum checks applicable to the type of journey/subjourneys will continue to be assessed for the reissue of a ticket where the first flight coupon has already been used before the approval date for this change.

The examples shown in this document are based on current/enhanced responses displayed in Apollo®, Galileo®, and Worldspan terminal emulation. Equivalent Apollo® and Galileo® Viewpoint™ displays will also show these changes when applicable.

Country of Payment (COP)

The COP is a pricing unit check which applies to normal and special fare round and circle trip pricing units. The IATA Reso mentions normal fares only, however in some cases, government mandates have applied it to both normal and special fares. The check requires that the fare for a round trip or circle trip pricing unit paid in the country of the check for travel to the country, or via the country cannot be less than the direct route fare from pricing unit origin to any ticketed point in the country of payment.

Example

Itinerary: BKK-TYO-BKK

	1	2	3	4	5	6
	12345678901	2345678901	2345678901	2345678901	2345678901	2345678901234
01	1	XX	772Y	10JUN	BKKNRT	HK1 735A 345P TU
02	2	ZZ	703Y	15JUN	NRTBKK	HK1 400P 855P * SU
03	>					

This is a round trip from BKK to TYO. COP applies to sales made in TYO.

Round trip fares:

City Pair	Fare	Fare type
TYO-BKK	1923.01	ER
TYO-BKK	2160.74	EU

Pricing response:

(current - COP applied; i.e. fare is raised to the TYO-BKK fare)

	1	2	3	4	5	6
	12345678901	2345678901	2345678901	2345678901	2345678901	2345678901234

02	END					

(enhanced - COP not applied)

	1	2	3	4	5	6
	12345678901	2345678901	2345678901	2345678901	2345678901	2345678901234
01	BKK	XX	TYO	M612.42YRT	ZZ	BKK M612.42Y NUC 1224.84 END

Common Point Minimum (CPM)

The Common Point Minimum applies when the surface sector at either origin, destination or both origin and destination of a normal fare open jaw is within one country, and each fare component contains a common ticketed point or points within that country.

The Common Point Minimum also applies when the surface sector is between different countries, and there is a common ticketed point or points in the country of the fare break point of one of the open jaw fare components. In the case where there is a common ticketed point(s), the fare charged for the normal open jaw pricing unit cannot undercut the applicable fare to/and or from the common point(s). If there is more than one common point, the fare charged for the open jaw pricing unit cannot undercut the fare to and/or from the higher/highest common point.

Example

Itinerary: MAN-LX-ZRH-BA-X/MAN-BHX

	1	2	3	4	5	6
	12345678901	2345678901	2345678901	2345678901	2345678901	2345678901234
01	1 XX 387J 10MAY	MANZRH HK1	610A	910A		SA
02	2 ZZ1693C 18MAY	ZRHMAN HK1	700P	755P		SU
03	OPERATED BY BRITISH AIRWAYS CITIEXPRESS					
04	3 X1 10C 18MAY	MANBHX HK1	930P	1030P		SU
05	>					

This example is a normal fare origin open jaw comprised of fare components MAN-ZRH and BHX-ZRH (showing the fare components in the direction that fares are assessed). The country of origin of the open jaw pricing unit is Great Britain. There is a common point of MAN on each fare component within Great Britain. The fare for the open jaw cannot be less than the fare would have been if priced MAN-ZRH-MAN.

Round trip fare:

City Pair	Fare	Fare type
MAN-ZRH	1187.54	EU

Pricing response:

(current - CPM applied; i.e. raised to MAN-ZRH round trip fare)

	1	2	3	4	5	6
	12345678901	2345678901	2345678901	2345678901	2345678901	2345678901234

	1187.54 END					

(enhanced - CPM not applied)

```

1          2          3          4          5          6
1234567890123456789012345678901234567890123456789012345678901234
01  MAN XX ZRH M593.77Y ZZ X/MAN X1 BHX 5M555.46Y NUC 1149.23 END
    
```

Directional Minimum Check (DMC)

The DMC requires that the fare charged cannot be less than the fare for the highest rated pair of points in either direction between any ticketed points within the fare component. It applies to tickets sold or ticketed outside the country of origin. It applies to international normal and special one way pricing units and normal open jaw pricing units.

The minimum fare is compared to the fare charged for the component, including mileage surcharges, Higher Intermediate Points (HIPs), and One Way Backhauls (BHCs).

Example

Itinerary: BKK-C-SIN-C-ATH

```

1          2          3          4          5          6
1234567890123456789012345678901234567890123456789012345678901234
01  1 XX 401C 10JUN BKKSIN HK1 715P 1035P TU
02  2 ZZ 348C 11JUN SINATH HK1 105A 710A WE

```

Fares

City Pair	Fare class	Amount	Fare Type	Controlling Carrier	Fare (carrier/IATA)
BKK-ATH	C	1453.32	BU	XX	YY
BKK-SIN	COW	270.47	BU	ZZ	ZZ
	C	270.47	BU		YY
SIN-BKK	C	410.98	BU	ZZ	YY
SIN-ATH	C2	1631.36	BR	XX	XX
	C	2057.81	BU		YY
ATH-SIN	C	2087.56	BU	XX	YY
ATH-BKK	C	1899.40	BU	XX	YY

In this example a through fare is charged BKK-ATH. SQ is the controlling carrier, and a YY fare is used. The DMC check applies BKK-SIN, SIN-BKK, SIN-ATH, ATH-SIN, ATH BKK. The fare charged for the component can not undercut the highest fare between any ticketed points. The minimum fare for this example is 2087.56.

Pricing response:

(current response – DMC applied; i.e. fare is raised to the ATH-SIN fare)

```

      1           2           3           4           5           6
1234567890123456789012345678901234567890123456789012345678901234
01 BKK ZZ X/SIN XX ATH 15M1671.31C P ATHSIN416.25 NUC 2087.56 END
    
```

(enhanced response – DMC not applied)

```

      1           2           3           4           5           6
1234567890123456789012345678901234567890123456789012345678901234
01 BKK ZZ X/SIN XX ATH 15M1671.31C NUC 1671.31 END
    
```

Normal Fare Check (OSC)

The OSC requires that a specified through fare is not undercut by a combination of fares. It applies between consecutive normal one way subjourneys (pricing units). It applies between domestic one way pricing units and consecutive international pricing units.

Example:

Itinerary: TYO-BKK-CMB

```

      1           2           3           4           5           6
1234567890123456789012345678901234567890123456789012345678901234
01 1 XX8265Y 10JUN NRTBKK HK1 600P 1015P TU
02 2 ZZ 423Q 12JUN BKKCMB HK1 900P 1120P TH
03 >
    
```

Fares

City pair	Fare class	Amount	Fare type	Rules
TYO-BKK	Y4	1228.42	ER	CAT 8=No stops
	Y	1366.32	EU	
BKK-CMB	QOW	351.76	EU	
TYO-CMB	Y	2131.13	EU	
	Y2	1727.58	ER	CAT 8=No stops

In this example, the through Y fare cannot be applied because segment 2 fails booking class. The fare quote is point to point. Segment 1 is fare type ER. Segment 2 is fare type EU. Both are economy class. The combination of fares undercuts the through fare TYO-CMB. The OSC applies. There are two fares for the carrier and class of service between TYO and BKK. The lower cannot be used because it fails stopovers. The fare must be raised to the Y fare TYO-CMB.

Pricing response:

(current response – OSC applied; i.e. the fare is raised to Y fare TYO-CMB)

	1	2	3	4	5	6
	12345678901	2345678901	2345678901	2345678901	2345678901	2345678901234

	12345678901	2345678901	2345678901	2345678901	2345678901	2345678901234
01	TYO XX BKK Q5.00 M1228.42Y4 ZZ CMB M351.76QOW NUC 1580.18 END					

Return Subjourney Check (RSC)

The RSC is a journey check which applies to normal fare pricing units consisting of return subjourneys/pricing units. The check requires that the total fare for the consecutive normal fare return pricing units cannot be less than the highest direct route fare from the origin of the first return pricing unit to any stopover point on any of the subsequent return pricing units.

Example:

Itinerary: TYO-X/BKK-KHI-MCT-KHI-X/KUL-TYO

	1	2	3	4	5	6
	12345678901	2345678901	2345678901	2345678901	2345678901	2345678901234
01	1	XX	73J	10JAN	NRTBKK	HK1 1120A 405P FR
02	2	ZZ	701J	10JAN	BKKKHI	HK1 655P 1020P FR

Normal Open Jaw – Europe as one country

Currently, the normal open jaw definition requires that any surface sector at origin must be within the same country, with exceptions as follows:

- Canada/USA are considered one country
- except for pricing units wholly within Scandinavia, Scandinavia is considered one country
- Aruba/Netherlands Antilles is considered one country

The definition of a normal fare open jaw has changed and Europe has been added to this list of exceptions. Per IATA:

Except for fares wholly within Europe, Europe is considered one country for the purpose of normal open jaw.

This impacts pricing unit creation. Currently, when a pricing unit originates in Europe, has a point of turnaround outside of Europe, and returns to a different country in Europe, the pricing solution is composed of fare components assessed in the direction of travel.

With this change, the pricing unit meets the definition of a normal open jaw, therefore both fare components will be assessed from the pricing unit origin.

Example:

Itinerary: LON-JNB-FRA

Glossary

Term	Definition
Country of Payment (COP)	A minimum check that requires that the fare for a round trip or circle trip pricing unit paid in the country of the check for travel to the country, or via the country cannot be less than the direct route fare from pricing unit origin to any ticketed point in the country of payment.
Common Point Minimum (CPM)	A minimum check that requires that the fare charged for the normal open jaw pricing unit cannot undercut the applicable fare to/and or from the common point(s) in an itinerary.
Directional Minimum Check (DMC)	A minimum check that requires that the fare charged cannot be less than the fare for the highest rated pair of points in either direction between any ticketed points within the fare component.
Normal fare Check (OSC)	A minimum check that requires that a specified through fare is not undercut by a combination of fares.
Return Subjourney Check (RSC)	A minimum check that requires that the total fare for the consecutive normal fare return pricing units cannot be less than the highest direct route fare from the origin of the first return pricing unit to any stopover point on any of the subsequent return pricing units.
