Why choose Galileo Leisure?

A wider choice of hotels

- As Galileo Leisure provides access to thousands of hotels including independent leisure hotels that are not traditionally on the GDS, it greatly **enhances your breadth of offering** to your customers.

Improve efficiency, lower costs

- Bookings made through Galileo Leisure can be integrated back into a Galileo Booking File to facilitate invoicing and itinerary creation, saving time and freeing up staff to perform other **revenue generating activity**.

Access to excellent negotiated rates

- Galileo Leisure gives you access to the excellent negotiated rates of OctopusTravel/GTA, one of the world's largest wholesalers.
- You deliver the competitive rates to your customers - and **earn valuable commission** in the process.

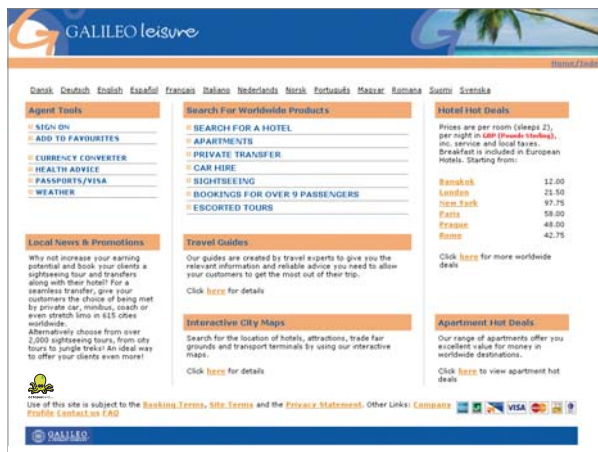

Customer-impressing destination information

- When customers demand more information about their holiday, Galileo Leisure gives it to you at the **touch of a button**, such as destination guides and real-time weather.

So how easy is Galileo Leisure to use...

Using Galileo Leisure to assist you in the day-to-day running of your business could not be simpler!

Accessing Galileo Leisure

- Galileo Leisure can be accessed by typing www.galileoleisure.com into your browser and clicking on the relevant country flag.
- Alternatively, you can add a button onto your desktop (Viewpoint 3.0 and Galileo Desktop V1.01 customers) or add a link from the companions menu (Focalpoint 3.5 Customers).

Easy to navigate & sell additional content

- On opening the Galileo Leisure home page, you will notice how easy it is for staff to build the components of a customers holiday piece by piece. Start with hotels or apartments and then add transfers, car hire and sightseeing.
- Galileo Leisure requires no training for your staff and each component they add generates extra revenue for your business.
- Requests for group bookings are also available.

Making a booking

- Making a booking in Galileo Leisure is just as easy. The great thing with Galileo Leisure is that you are able to browse OctopusTravel/GTA content and check out deals before having to log in.
- A booking can be completed from start to finish in a few simple steps and as the content can be integrated into a Galileo Booking file, using Galileo Leisure will not only make you more efficient, but save you time as well.

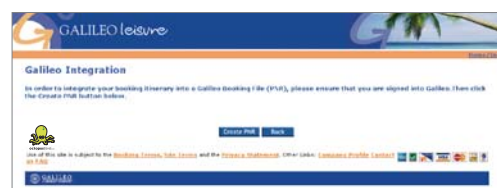

- Once you've entered your search criteria you will be presented with more information which can be used to enhance the sale.

- You are then given the opportunity to add other content e.g. make a transfer - to the booking which will earn commission and increase your revenue.

Integration of the booking into a Galileo booking file

- Once you have completed the booking process, you will be given an option to integrate the booking into a Galileo Booking File* so it can then be handed-off to a back-office system for accounting purposes. (*Viewpoint 3.0 and Galileo Desktop v1.01 customers only).

Single itinerary

- To enhance your customers service even further, you can also print an itinerary which includes all the booking content from www.viewtrip.com - Galileo's online itinerary viewer.
