XML messages displayed during launch of Desktop 4.0

Various error and warning messages may display during launch of Galileo Desktop 4.0 including any of the below:

"Error loading CML Menu file " C:\fp\swdir\
content\languages\enu\focalpointpartition.menu.xml", error "class not
registered". Description: "(null)".

"Could not load the menu file: "C:\FP\Swdi
r\content\language\enu\focalpointpartition.menu.xml", defaulting to
resourse file.

"Could not load partition accelerators"

An Error has occured in the script on this page.
Line 185
Char 3
Error The specified module could not be found
Code 0
URL File //C:\fp\swdir\content\language\enu\pnr.html

"Runtime Error"
Program C:\FP\Swdir\Viewpoint.exe
Abnormal program termination

It has been found that re-installing MSXML 4.0 from the Microsoft support web site resolves these issues, without the need to reinstall Galileo Desktop itself.

MSXML 4.0 Service Pack 2 (Microsoft XML Core Services)
