For today, one-way	A¤LAXORD:OW

Pricing Itineraries

Pricing as Booked ($B)

To:	Type:
Price all passengers as booked	$B
Redisplay $B response	*$B

Pricing at Best Buy ($BB)

Best buy prices the booked flights at the lowest available fare.

To:	Type:
Price at best buy	$BB
Price at best buy and rebook	$BB0
Price the booked flights at the lowest fare regardless of availability	$BBA
Price as booked and compare it to the lowest available fare	$BBC
Price at best buy as if booked today	$BBT
Redisplay $BB response	*$BB

Pricing at Best Buy Quote™ ($BBQ)

Best Buy Quote prices the booked flights at the lowest available fare and provides up to six alternate itineraries with lower fares. Because Best Buy Quote checks availability of alternate itineraries, you can use it with pricing and availability modifiers. Pricing modifiers precede availability modifiers. A double slash (//) precedes availability modifiers.

To price at Best Buy Quote for:	Type:
Basic format	$BBQ
Segments 3 and 4	$BBQS3‡4
Only nonstop and direct flights	$BBQ//D
Segments 3 and 4, only nonstop and direct flights	$BBQS3‡4//D

Arrival time 24 hours before and after booked itinerary and J booking class	$BBQ//A24/¤J
Maximum journey time of no more than 3 hours over the journey time of booked itinerary	$BBQ//J3
Redisplay Best Buy Quote	*$BBQ

Pricing with Galileo Optimal Shopping^{SM} (FS)

Pricing with Galileo Optimal Shopping^{SM} (FS)

Galileo Optimal Shopping prices a booked North American itinerary at the lowest available fare and finds up to 150 alternate itineraries. You can search for fares based on customer needs such as cheapest, fastest, or business, and control the number of itineraries returned. Optimal Shopping is available to Apollo® subscribers in Canada and USA.

To price with Optimal Shopping for:	Type:
Basic format	FS
Cheapest fare	FSCH
Maximum 10 itineraries	FS¤10
Fastest fare, maximum 70 options	FSFA¤70
Segments 1 and 4	FSS1‡4
25% discount	FS*DP25
Airline Private Fares with account code Acme or no account code	FS-ACME
Senior citizen fare age 62	FS*SRC62
Senior citizen age 62 resident of British Columbia	FS*SRC62LCABC
Net fares only (Airline Priviate Fares)	FS:C
No restrictions	FSNR
Specific airlines	FS//‡AC.DL.NW
Only nonstop and direct flights	FS//D
Leisure fare, maximum 100 itineraries, youth age 19	FSLE¤100/*YTH19
Redisplay Optimal Shopping	*FS

Pricing with Modifiers

You can use most pricing modifiers with $B, $BB, $BBQ, T:$B, and FS formats.

Name Select (N)

To price:	Type:
1st Name field	$BN1
1st Name field, 2nd passenger	$BN1-2
2nd Name field, 1st passenger and 3rd Name field	$BN2-1‡3

Segment Select (S)

To price:	Type:
Segment 3 only	$BS3
Segments 3 through 5	$BS3*5
Segments 1 and 3 through 5	$BS1‡3*5
All segments, including waitlists	$BSALL
Name field 1, segments 2 and 3	$BN1/S2‡3

Discount Fares (*)

To price:	Type:
25% discount off the published fare (max. 100%)	$B*DP25
$25.00 discount off the base fare (matches currency of origin city)	$B*DF25
$25.00 discount off the total fare (NAFQ)	$B*DFT25
1st Name field at adult fare and 2nd Name field at 10% discount	$BN1‡2*DP10
10% increase to the published fare (max. 250%)	$B*IP10
$50.00 increase to published fare (max. 7 numerics)	$B*IF50

Passenger Type Code (*)

Carriers file passenger type codes (PTCs) that apply to special passenger fares, such as senior, companion, youth, military, child, some private fares, etc. PTCs for the same special passenger can vary from fare to fare and carrier to carrrier. The PTC required to price a special passenger fare, appears below the fare line in the tariff display.

For fares that require travel together, such as companions, children, and infants, you must price both passengers in the same entry to validate accompanied travel provisions.

For fares that require age validation, such as senior, youth, student, and child, add the passenger's age.
- If the PTC ends with NN, enter the age in place of the NN. Example: $B*S65
- If the PTC does *not* end with NN, enter the age after the PTC. Example: $B*SRC65

To price:	Type:
A senior citizen age 60	$B*SRC60
A youth age 18	$B*YTH18
Military fares only	$B**MIL
An infant fare	$B*INF
Companion fares 1st Name field, 1st passenger at the *CMA fare and 1st Name field, 2nd passenger at the *CMP fare	$BN1-1*CMA‡1-2*CMP
Adult and child fares 1st Name field at adult fare and 2nd Name field at child (age 10) fare	$BN1‡2*C10
Adult and infant with seat 1st Name field at adult fare and 2nd Name field at infant with seat fare	$BN1‡2*INS

Personal Geography (L)

To price:	Type:
Ship's crew registered in Canada	$B*SEALCA
Government employee of Florida	$B*GSTLUSFL
10 year-old resident of Quebec	$B*C10CAPQ
65 year-old senior citizen of Great Britain	$B*SRC65LGB

Fare Identification Code (¤)

Use FIC with $B or T:$B but *not* $BB, $BBQ, or FS. Because FIC overrides the rules, it's your responsibility to ensure that all restrictions are met.

To price:	Type
At fare basis QHX7	$B¤QHX7
Segment 1 at QHX7 and segment 2 at QHW7	$BS1¤QHX7‡2¤QHW7
Segment 1 at QHX7 and segment 2 at QHW7 for private fares account code ACME	$BS1¤QHX7-ACME‡2¤QHW7-ACME
